Important things to know about selecting or changing your PCP

A primary care physician (PCP) is your health guide – someone who can help coordinate your care and support you in achieving your best health.

Your PCP:

- Must be a general practice, family practice, pediatrician or internal medicine provider
- Must be an individual provider, not a medical practice
- Must be accepting new patients (if you are not a current patient)
- Must be located in a town or city near where you (the subscriber) live or work
- Can be selected for the entire family or each covered member can select their own

If changing your PCP, please select a new PCP and have their Provider ID number. You can change your PCP by signing in at myuhc.com or by calling us at **1-888-586-6365**.

It's easy to browse network PCPs

- Go to whyuhc.com/csveba > Search for a Provider
- Select the network you are in or interested in searching
- Update your location if necessary
- Select People > Primary Care > Select type of physician
- From the provider listing, either enter in the name of the PCP you would like to look up or click on the name of the PCP you'd like to select and write down the 10-digit Provider ID number – you'll need it when you enroll or change your PCP.

Where to go for care

When you need care, call your primary care physician or family doctor first

Your physician has easy access to your records, knows the bigger picture of your health and may even offer same-day appointments to meet your needs. When seeing your physician is not possible, it's important to know your quick care options to find the place that's right for you and help avoid financial surprises.

Take the time to care for yourself

Like any machine, your body needs regular maintenance. Catching health problems early is an important way to help keep your body running strong. Also, because many health conditions have no symptoms, preventive care may help you catch health problems early, when they're easier and less expensive to treat.

Get the care you need

Regular preventive care helps you and your doctor catch health issues early – plus it's 100% covered by your health plan when you see a network doctor.

Covered preventive services include:

- An annual exam
- Cancer screenings
- Cholesterol and blood pressure screenings
- Immunizations – including flu shots
- Pap tests and mammography for women
- Prostate screenings for men

Know which preventive care screenings you need and what's covered. Visit uhc.com/health-and-wellness/preventive-care.
