# Follow these steps to choose your Primary Care Physician

Your health plan options require you to select a primary care physician (PCP) for you and each family member covered under your plan. Your PCP is your health guide — coordinating your care, helping you avoid cost surprises and supporting you in achieving your best health.

To get started, you can search for a PCP on the premember site, **whyuhc.com/uhg.** Once you're there, click on "Health and Pharmacy Tools" and find your plan* under "Plans and network providers". Click the link and follow the 6 steps below.
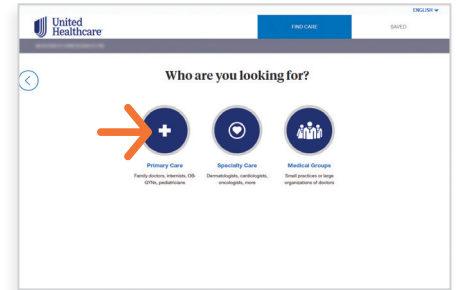

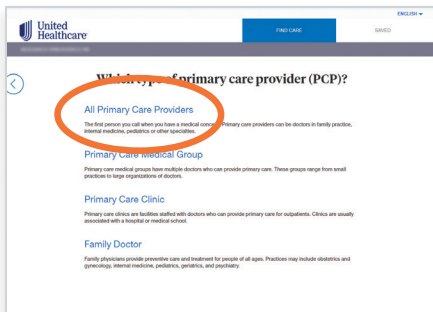

1 Select **"Change Location"** to update ZIP code.

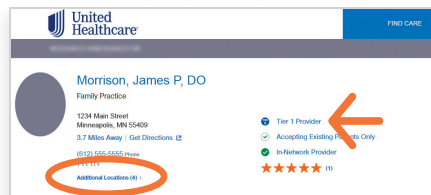

2 Select **"People."**

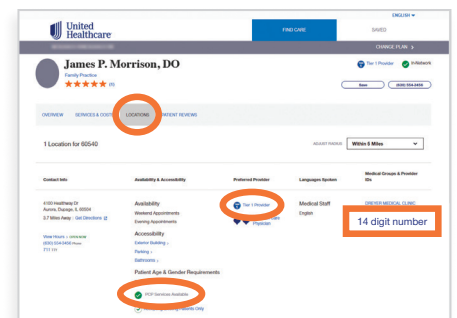

3 Select **"Primary Care."**

4 Select **"All Primary Care Providers."**

5 Select a PCP and view on the Locations tab to ensure the specific location for the provider offers PCP Services. If it does not say "PCP Services Available," you must choose a different location or PCP. If you are enrolling in the Accountable Care Plan, select a provider with the Tier 1 blue dot to receive the highest benefit.

6 Locate your PCP's Provider ID here and copy and paste it into your enrollment information. The NPI is not the Provider ID.
