They have easy access to your records, know the bigger picture of your health and may even offer same-day appointments. If it's not possible to see them, it's important to know your quick-care options so you can find the place that's right for you and avoid financial surprises.

24/7 Virtual Visits

When you need care quick, a 24/7 Virtual Visit is a convenient way to start feeling better faster. Video chat with a doctor using a computer or mobile device* from the comfort of home. Doctors can diagnose a wide range of medical conditions and even prescribe prescriptions, if needed.** And with a UnitedHealthcare plan, your cost is \$30 or less. To get started, go to uhc.com/virtualvisits.

Prepare for your 24/7 Virtual Visit

Have these 3 items handy:

- Health plan ID card
- Credit card
- Pharmacy location

*Data rates may apply.

**Prescription services may not be available in all states.

***As per state telehealth rules and regulations. Certain prescriptions may not be available, and other restrictions may apply.

Behavioral health virtual visits

Talk with a psychiatrist or therapist right from home to get help with general mental health conditions such as anxiety or depression. Your provider can even prescribe medications, if appropriate.***

To find a behavioral health provider or schedule a virtual visit:

1. Sign in to or register on myuhc.com and go to **Find a Doctor > Behavioral Health Directory > People > Provider Type > Telemental Health Providers**
2. Call your chosen provider to set up an appointment

Take time to care for yourself

Your body needs regular maintenance. Preventive care can help you catch health problems early, when they're easier and less costly to treat.

Get the care you need

Regular preventive care is covered 100% by your health plan when you see a network doctor.

Covered preventive services include:

- An annual exam
- Pap tests and mammography for women
- Prostate screenings for men
- Immunizations—including flu shots
- Cancer screenings
- Cholesterol and blood pressure screenings

To see which preventive care screenings you need and what's covered, visit uhc.com/preventivecare.

Make the most of your visit

- **Plan ahead.** Write down any symptoms, concerns or questions so you don't forget.
- **Listen carefully.** Be sure you understand what your doctor is telling you. Ask for written instructions, if needed.
- **Take someone with you.** They can take notes and help you remember what was said.
- **Ask questions.** Tell your doctor if you have any concerns about your treatment and recommended screenings or about any costs.

Be informed

Depending on your benefit plan, you may have to pay for any diagnostic services done during your preventive care visit.

Preventive vs. diagnostic care.

Preventive care includes routine screenings performed during your annual preventive care visit, when you don't have specific symptoms to be checked or an illness to be treated.

Diagnostic services include treatment for specific conditions, ongoing care, lab work or other tests needed to manage or treat a health condition.

Work with your doctor to manage chronic conditions. Following your doctor's recommendations and taking your prescribed medications can make a big difference in your health.

Don't have a network doctor? Find one at myuhc.com or call **1-800-382-7513, TTY 711**.
