Price Edge delivers discounted pricing on medications

Your UnitedHealthcare pharmacy benefit now includes Price Edge. This discount price solution helps you save on generic medications covered by your benefit plan and specific brand and generic drugs not covered by your benefit plan.

How Price Edge works:

You're already set up. Keep using your current network pharmacy.

Fill your prescriptions as usual and automatically get lower copays on some covered medications.

For medications not covered, even over-the-counter products, receive a discounted price with a prescription from your doctor.

Scan here to download the UnitedHealthcare app or log in at **myuhc.com®** to check medication prices.
